

Required Inspections – Commercial

➤ Footing Inspection

This is done after footing has been formed and all steel is installed.

➤ Foundation Inspection

This is done after foundation walls are formed and all steel is in place.

➤ Rough-In Underground Plumbing

This is done after the under slab plumbing has been installed. (**Water 60 PSI**) (**DWV 5 PSI or 10 Foot Head**)

➤ Gas Piping Rough-In

This is done after all piping and fittings have been installed, prior to concealment. A pressure test is required at this time.

➤ Framing Inspection

This is done after the rough framing is in place and before any concealment of framing structure.

➤ Above Ceiling

At this time all fire separations must be complete and any sprinkler piping complete.

➤ Sprinkler Hydro Test

This is done at after all sprinkler piping has been installed.

➤ Final Inspection

This is done after the structure has been complete and prior to occupying the structure.
